Universal Bracket

IP67 Upgrade Kit (Vent and Gasket)

Gigabit PoE (24V, 1A) with Mounting Bracket

Power Cord

# Antenna Compatibility

The LTU-Rocket is designed for use with the following Ubiquiti® airMAX® Sector antenna models\* for Point-to-MultiPoint mode:

- AM-5AC21-60
- AM-5AC22-45
- AM-V5G-Ti
- AM-M-V5G-Ti
- AM-5G16-120

- E
- AM-5G20-90
- AP-5AC-90-HD
- \* Requires Universal Bracket (included).

## **Installation Requirements**

- Clear line of sight between LTU<sup>™</sup> AP and stations
- · Clear view of the sky for proper GPS operation
- Vertical mounting orientation
- Mounting point:
  - At least 1 m below the highest point on the structure
  - For tower installations, at least 3 m below the top of the tower
- Ground wires min. 10 AWG (5 mm<sup>2</sup>) and max. length: 1 m. As a safety precaution, ground the LTU radio to a grounded mast, pole, tower, or grounding bar.

WARNING: Failure to properly ground your LTU radio will void your warranty.

- Outdoor, shielded Category 6 (or above) cabling and shielded RJ45 connectors are required for all wired Ethernet connections.
- Surge protection should be used for all outdoor installations. We recommend that you use two Ethernet Surge Protectors, model ETH-SP-G2, one near the device and the other at the entry point to the building. The ETH-SP-G2 will absorb power surges and safely discharge them into the ground.

Note: For guidelines about grounding and lightning protection, follow your local electrical regulatory codes.

\* Shown without antenna.

# Hardware Overview

LTU-Rocket Quick Start Guide

1 LTU Antenna Connectors

Used to attach RF antenna cables (not included).

2 GPS Antenna Connector

Used to attach the GPS Antenna.

Each LED will light when the wireless signal strength is equal to or greater than the LED's threshold value for the current channel width setting. The default threshold values for each channel width are shown below:

	10 MHz	20 MHz	30 MHz	40 MHz	50 MHz				
	-62 dBm	-59 dBm	-57 dBm	-55 dBm	-51 dBm				
	-69 dBm	- <b>66</b> dBm	-64 dBm	-61 dBm	-56 dBm				
	-73 dBm	-70 dBm	-68 dBm	-68 dBm	-65 dBm				
	-80 dBm	-78 dBm	-76 dBm	-73 dBm	-72 dBm

Gigabit PoE port for handling all user traffic and powering the device. Default IP address: 192.168.1.20				

# Installation Overview

We recommend that you configure your LTU-Rocket radio before site installation. The following sections provide detailed installation instructions. Perform these instructions in the sequence given.

# **Connecting Power over Ethernet**

WARNING: Use only the included adapter, model POE-24V-5X-HD. Failure to do so can damage the unit and void the product warranty.

# LTU Configuration

Access the LTU Configuration Interface for configuration. By default, Access Point mode is already enabled for the LTU-Rocket. You can choose to configure settings such as Link Name, Duty Cycle, Channel Bandwidth, and Frequency.

The PTMP stations will scan and find the LTU-Rocket and do not need any frequency set as long as they are set with the same Channel Bandwidth and Link Name.

#### **Configuration Using Browser-Based Interface**

- 1. Configure the Ethernet adapter on your computer with a static IP address on the 192.168.1.x subnet.
- 2. Launch your web browser. In the address field, type: http://192.168.1.20 Then press enter (PC) or return (Mac).

3. Select your Country and Language. You must agree to the Terms of Use, EULA, and Privacy Policy to use the product. Click Continue.

	and the second se

- 4. Click the 🛜 icon.
- 5. Configure the following settings:
  - a. If needed, change the Channel Bandwidth, Frequency, Output Power (EIRP), Antenna Gain, and Max TX Modulation settings. The Channel Bandwidth should be the same on all devices in the PtMP link.
  - b. In the Security Key field, enter a combination of alphanumeric characters (0-9, A-Z, or a-z).

Note: The key is an alphanumeric password between 8 and 63 characters long.

## Upgrade for IP67 Compliance

To protect the LTU-Rocket from intrusion by water, dust, and insects, we recommend installing the IP67 Upgrade Kit (included):

1.

Note: Do not damage or remove the post on the Port Cover.

4.

3.

# Hardware Installation

# Installing the Ground Wire

1.

3. At the installation site, secure the other end of the ground wire to a grounded mast, pole, tower, or grounding bar.

WARNING: Failure to properly ground your LTU radio will void your warranty.

Note: The ground wire should be as short as possible and no longer than one meter in length.

## Mount to an airMAX Sector Antenna

The LTU-Rocket is designed to mount directly onto the Ubiquiti antennas listed in <u>"Antenna Compatibility"</u>. The airMAX Sector antenna AM-5AC21-60 is shown in this section:

### Mount the External GPS Antenna

Locate a mounting point that has a clear view to the sky, and is above and as far away as possible from the LTU-Rocket.

1.

OR

3.

# **Connecting Power over Ethernet**

2.

OR

Note: If the IP67 Upgrade Kit is installed, first apply dielectric grease to the cable connector and port.

WARNING: The LTU-Rocket must receive a minimum of 15W. Ensure that the voltage range of the PoE source is within these limits:

- 4-pair operation: 18-54V
- 2-pair operation: 30-54V

OR

WARNING: Use only the included adapter, model POE-24V-5X-HD. Failure to do so can damage the unit and void the product warranty.

Devices must be professionally installed and it is the professional installer's responsibility to make sure the device is operated within local country regulatory requirements.

## Antenna

Select your antenna from the list. If Auto Output Power is enabled, transmit output power is automatically adjusted to comply with the regulations of the applicable country. For a Custom antenna, Antenna Gain is entered manually. Note the requirements and antenna types listed below.

### Cable Loss (When applicable)

Enter the cable loss in dB. Output power is adjusted to compensate for loss between the radio and the antenna.

## **Certified Antenna Types**

This radio transmitter FCC ID: SWX-LTUR / IC: 6545A-LTUR has been approved by FCC / ISED Canada to operate with the antenna types listed below with the maximum permissible gain for each antenna type indicated. Antenna types not included in this list or having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Antenna	Frequency	Gain
Sector	5 GHz	22 dBi

# Safety Notices

- 1. Read, follow, and keep these instructions.
- 2. Heed all warnings.
- 3. Only use attachments/accessories specified by the manufacturer.

WARNING: Do not use this product in location that can be submerged by water.

WARNING: Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

# **Electrical Safety Information**

- 1. Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.
- 2. There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.
- 3. This equipment is provided with a detachable power cord which has an integral safety ground wire intended for connection to a grounded safety outlet.
  - a. Do not substitute the power cord with one that is not the provided approved type. Never use an adapter plug to connect to a 2-wire outlet as this will defeat the continuity of the grounding wire.
  - b. The equipment requires the use of the ground wire as a part of the safety certification, modification or misuse can provide a shock hazard that can result in serious injury or

installation prior to connecting the equipment.

- d. Protective earthing is provided by Listed AC adapter. Building installation shall provide appropriate short-circuit backup protection.
- e. Protective bonding must be installed in accordance with local national wiring rules and regulations.

## **Limited Warranty**

#### ui.com/support/warranty

The limited warranty requires the use of arbitration to resolve disputes on an individual basis, and, where applicable, specify arbitration instead of jury trials or class actions.

## Compliance

### FCC / CAN ICES-3(A)/NMB-3(A)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules and ISED Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions.

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1. l'appareil ne doit pas produire de brouillage;
- 2. l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This equipment has been tested and found to comply with the limits for a Class A digital device. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operations of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

#### IMPORTANT NOTE

#### **Radiation Exposure Statement**

- This equipment complies with radiation exposure limits set forth for an uncontrolled environment.
- This equipment should be installed and operated with minimum distance 130 cm between the radiator and your body.
- This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

#### Déclaration sur l'exposition aux rayonnements

- Cet équipement est conforme aux limites prévues pour l'exposition aux rayonnements dans un environnement non contrôlé.
- Lors de l'installation et de la mise en fonctionnement de l'équipement, assurez-vous qu'il y ait une distance minimale de 130 cm entre l'élément rayonnant et vous.
- Cet émetteur ne doit être installé à proximité d'aucune autre antenne ni d'aucun autre émetteur, et ne doit être utilisé conjointement à aucun autre de ces appareils.

#### Australia and New Zealand

Warning: This equipment is compliant with Class A of CISPR 32. In a residential environment this equipment may cause radio interference.

#### Brazil

Nota: Este equipamento não tem direito à proteção contra interferência prejudicial e não pode causar interferência em sistemas devidamente autorizados.

### **CE Marking**

CE marking on this product represents the product is in compliance with all directives that are applicable to it.

BFWA (Broadband Fixed Wireless Access) members noted in blue

Note: This device meets Max. TX power limit per ETSI regulations.

The following apply to products that operate in the 5 GHz frequency range:

Note: This device is restricted to indoor use only when operating in the 5150 - 5350 MHz frequency range within all member states.

Note: All countries listed may operate at 30 dBm. BFWA member states may operate at 36 dBm.

Note: Operation in the 5.8 GHz frequency band is prohibited in BFWA member states. Other countries listed may use the 5.8 GHz frequency band.
